

Step 1

String Beads

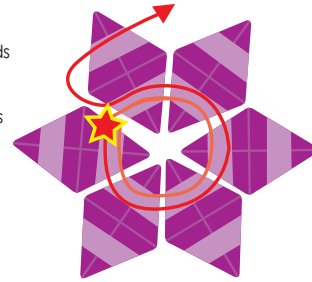

Moving from left to right, string 6 DD using their upper holes.

Step 2

Rethread Beads

Loop back into first DD, rethreading same 6 DD beads using the same holes in a counterclockwise rotation. Pull both ends of thread- beads should form a tight ring. Reverse thread's direction, threading outer hole of uppermost DD.

KEY	
	Entry Point
	Half-Hitch Knot
	Thread's Direction
	Previous Steps
	= Es-o MINI ES
	= DiamonDuo DD
	= Seed Bead SB
	= Open Jump Ring JR

Step 3

Add Es & SB Loop

Add 1 SB. Thread ES using left hole. Add 5 SB. Using right angle weave, loop back and rethread 2nd SB just added, threading in the same direction. Add 1 SB. Pull thread to tighten. Rethread same ES using vacant right hole, moving back in towards DD ring. Pull thread to tighten SB loop, fastening it to ES.

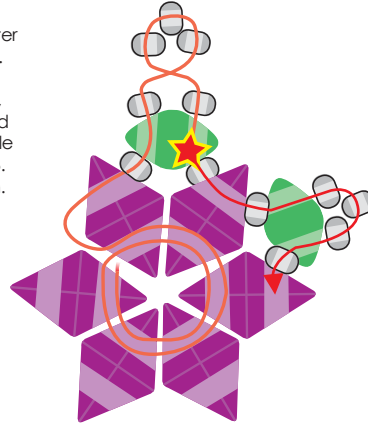

Rethread and Loop Through 2nd Seed Bead (Right Angle Weave)

Step 4

Add Es & SB

Add 1 SB. Thread outer hole of adjacent DD. Add 1 SB. Thread left hole of additional ES, add 3 SB, then thread back into vacant hole of same ES. Add 1 SB. Pull thread to tighten.

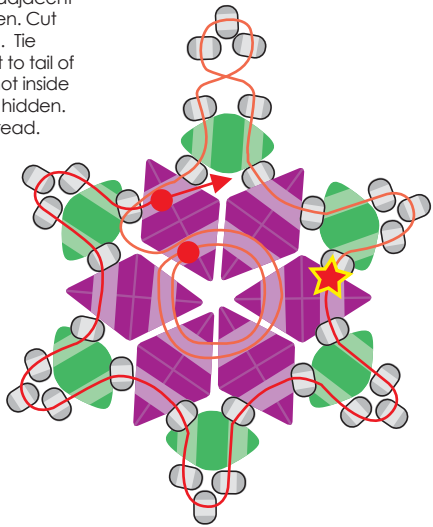

Repeat Steps 1- 4 x 4 Times
Moving Clockwise
Around DiamonDuos

Step 5

Tie Knots & Cut Excess

Continue beading clockwise around the DD ring. After threading last SB, tie half-hitch knot. Pull knot through adjacent DD so its hidden. Cut excess thread. Tie half-hitch knot to tail of thread. Pull knot inside DD so that it's hidden. Cut excess thread.

Step 6

Add Jump Ring: Pendant & Ear Wire

Using pliers, open ear wire loop and close it around uppermost SB loop. For the pendant(s), open and close a jump ring around the lower seed bead loop and pendant(s).
