You will need:

 Silky Beads (A) 63 pieces

 O-Beads (B) 7,5 grams

 Super Duo beads/ Super Uno Beads (C). 10 grams SD (or 5 grams SD and 5 grams SU)
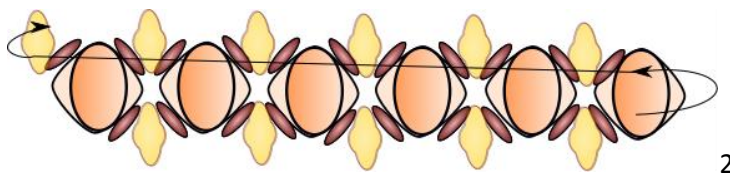

KO thread in the right color

Attention:

You can use only Super Duo beads, or you can choose to use Super Uno beads in step 1 and 7 instead of Super Duos

In the drawings you see less beads than you have to use for a full bracelet.

1

Pick up A,B,C,B and repeat this 20 x for a bracelet of 18 cm without the clasp (a total of 21 A beads). End this row with an A bead and pass back through the second hole of that A bead (In this step you can use Super Uno beads instead of Super Duo beads)

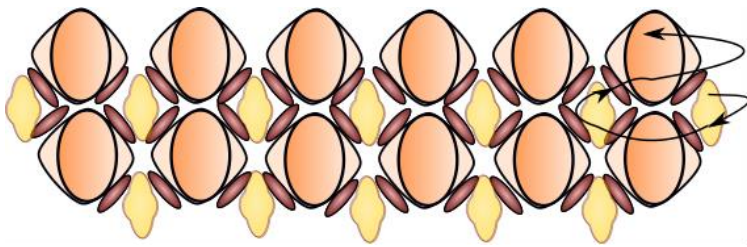

2

Pick up B,C,B and pass through the second hole of the next A of the previous row. Repeat until the end.

Pick up 1 x B and 1 x C and pass back through the second hole of the C bead

3

Pick up B,A,B and pass through the second hole of the next C bead of the previous row. Repeat this until you passed through the last C bead. Pass back through the second hole of that C bead.

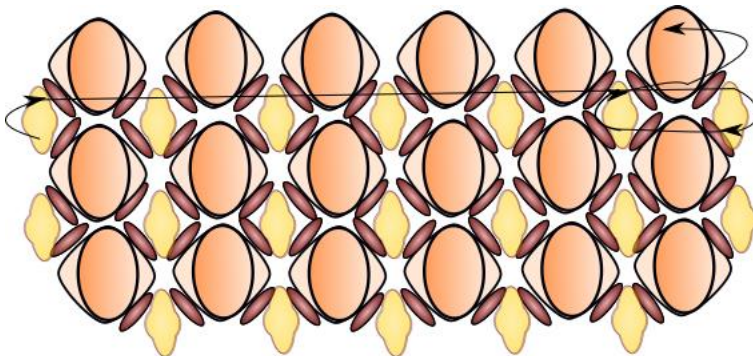

4

Pass through the B,A,B,C (you added in previous steps). Pass back through the second hole of the C bead. Pass through the B and A bead (you added in the previous step) and pass back through the second hole of the A bead (see thread path in picture 4).

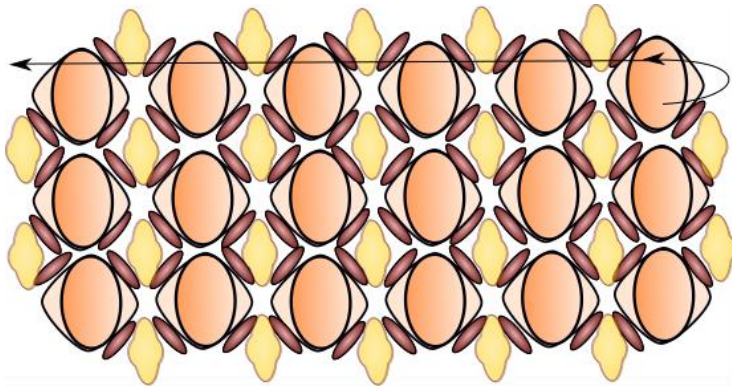

5

Repeat step 2.

6

Repeat step 3 and 4.

7

Repeat step 2, but end your row after the last A bead (you can use Super Uno beads instead of Super Duo beads).

Finally add your clasp.
