CELEBRATE HALLOWEEN WITH THIS ACCESSORY

Arachnida *vitreus*

PRECIOSA

Arachnida vitreus

*Do you like to be afraid at Halloween or do you wish to frighten your friends?
Why not try making your very own glass spider. Use the wide range available from
PRECIOSA Traditional Czech Beads™.*

Materials and tools:

PRECIOSA Pressed Beads
14 mm to 26 mm oval bead
(depending on the size of the spider);
1x dark shade (PB1)

8 mm to 12 mm round bead
(depending on the size of the spider);
1x dark shade (PB2)

PRECIOSA Rocailles
311 19 001; 10/0; 23980; 8x (R10)

311 19 001; 8/0; 23980; 98x (R8)

PRECIOSA Bugles
351 12 001; 5"; 15101; 24x

PRECIOSA Drops
311 11 001; 8/0; 18549; 26x

a 50 mm pin or eye pin; thin 0.35 - 0.40 mm
binding wire; thick 0.80 mm binding wire;
a carabiner; rings; a chain

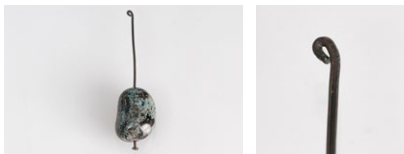

snipping pliers; pliers with a round point;
flat-nosed pliers (for tightening the wire);
a thin needle; a 0.20 mm nylon line

Difficulty: ●●●●●

Procedure:

Step 1:
String the PB1 onto the pin. Bend the free end
of the pin or create a small loop. Secure the wire
so that it does not fall out.

Step 2:

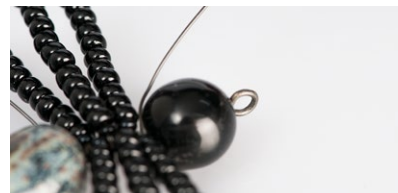

Make the legs.

Start near the twisted end and add the legs in
the direction towards the PB1. Cut off about
60 cm of the thin binding wire. Twist the end
of the wire around the pin. String 1x R10 and
12x R8. Only thread the wire through the last R8
once. Thread the wire through the other 11x R8
and the 1x R10 one more time. Tighten the wire.
Twist it around the pin once. Make the next five
legs in the same way.

Step 3:

Snip off the twisted end of the pin.
String the PB2. Push the legs up on the pin.
You need about 8 - 10 mm of free pin behind
the PB2. Make a loop out of it. Twist the wire
around the round point.

Step 4:

Turn the spider on its back. Now complete
the 7th and 8th legs. String 1x R10 and 12x R8.
Only thread the wire through the last R8.
Thread the wire through the other 11x R8 and
1x R10 one more time. Tighten the wire.
Do not twist it around the pin. Make the last leg
in the same way. Now twist both ends
of the wire around the pin several times.
Tighten and snip off.

Step 5:

Create the eyes.

Thread the line through the created loop.
String 1x R8 on both ends of the line. Return one
end of the line to the created loop. Tie off both
ends of the line. Carefully thread both ends
of the line through the R8. Cut it off.
Make sure that the knots do not come undone.

Step 6:

Shape the legs.

You can use bugles to make the legs.
Three bugles per leg. String 1x R8 between
each bugle. The legs will be longer, so snip
off a longer piece of binding wire.

If you use an eye pin to create the spider,
you can hang it, for example, from a chain.
Link the eye on the pin with the chain using
a ring. Attach the other end of the chain
to a carabiner.

Use the thick binding wire to string
the pressed beads for spiders with a large
body. Create a double loop at its ends.
You can use drops to highlight the eyes
and joints on the legs.
