Difficulty: ●●●●●

Procedure:

Step 1:
Thread the needle. String 10x R10, 1x PI and 10x R10. Thread the needle through the PI (fig. no. 1). A loop of R10 will be created, on which you will attach the fastening. Do not forget to tighten the thread when working.

Step 2:
String 3x P and once again thread the needle through the PI in the same direction from the loop to the rocailles (fig. no. 2).

Step 3:
String 3x P again and thread the needle through the PI so that a flower is created (fig. no. 3).

Step 4:
Thread the needle through the following 10x R10, tie the ends and continue with the work. String 1x PI, 3x P and thread the needle back through the PI (fig. no. 4).

Step 5:
String 3x P and thread the needle through the PI. You have created another flower. String 10x R10 (fig. no. 5).

Step 6:
String 1x PI and 3x P again and thread the needle back through PI (figure 6). Repeat the procedure according to figures 5 and 6 until you have the required length of the bracelet.

Step 7:
After achieving the required length of the bracelet, string 10x R10 and thread the needle back through the PI. This will create a loop for the fastening. Sew the thread in firmly and tie several knots. Cut off the thread (fig. no. 7).

Finishing:
use the flat nose pliers to attach the fastening – the ring and the carabiner. You can use Th beads to additionally decorate the end of the bracelet with the rings (fig. no. 8).
